Amendments to the Specification

Please amend the specification as follows:

On page 10, please replace the paragraph at lines 7 to 11 as follows:

Examples of higher adamantanes include diamantane, triamantane, and tetramantane. In general, adamantanes have the general formula of $C_{(4k+6)}H_{(4k+12)}$ where $k = 0, 1, 2, 3$, and so on. When k is [[0]] 1, the formula is that of adamantane; when k is [[1]] 2, the formula is that of diamantane; when k is [[2]] 3, the formula is that of triamantane, and so forth.
